BIOGRAPHY

Exotherm convince with dynamic and variegated songs and vocals full of mutability, covering everything from melancholic passages to aggressive shouts. Traditional Heavy to Power Metal meets influences from several Metal genres and modern elements, while always steering clear of the NU edge. So, the band's multifaceted songs and catchy tunes appeal to a big audience. Exotherm was founded in 1998 in Wipperfürth (near Cologne, Germany). In 1999, Georg Laudenberg completed the line-up with his amazing voice and his gift for working an audience. In the meantime, many small and several bigger happenings and festivals with an average of 400 people have been enjoying Exotherm's wildly energetic shows and the band has been featured on several samplers (Visions of Metal II 2003, Joining Forces 2004, Breaking The Silence 2004). The new album "Project 47" was released by Limited Access Records in October 2004. In the spring of 2005, Dutch distributor Two Fat Men will distribute it worldwide. Currently, the band is preparing a new release.

- 1 - 4...1...
- 2 - Believe in God
- 3 - It's time
